

# Aspen Vista® CTO4

The Vista® CTO4 is designed to increase motion restriction in all three planes of motion—flexion/extension, lateral bending, and axial rotation. Even while providing this level of motion restriction, the Vista CTO4 is comfortable for patients, and is padded at all contact points to help ensure compliance. It can easily be stepped down to the Vista CTO and then the Vista MultiPost to support the progression of care.

## Adjustable

One size adjustable.

## Properties

- Maximum motion restriction
- Comfort without compromising care
- Supports progression of care

## Indications

- Post-surgical stabilization
- Cervicothoracic instability
- Fracture management

## Product Features

### Adjustable Cervical Care

Features adjustable front and back panels for patients who require more control of the cervical spine.

### Easily Steps Down to Support Progression of Care

As a patient's condition improves, the Vista CTO4 can be stepped down to the Vista CTO then down again to the Vista MultiPost Collar, all without the use of tools.

### Comfort Without Compromising Care

Adjustable low profile back strut designed for maximum patient comfort, even in the supine position.

### Pivoting Occipital Panels

Padded panels pivot bilaterally and self-adjust to cradle virtually all head shapes for increased support and to help maximize comfort.

### Padded for Comfort

Fully padded at all patient contact points to help maximize comfort, encouraging improved patient compliance.
