SHOCKWAVE & LASER

EMS Guided DolorClast® Therapy

EMS - the inventors of Radial Shock Wave Therapy - The game changer in Pain Therapy

EMS⁺

Guided DolorClast® Therapy (GDT)

is a treatment concept based on combined therapy for practitioners who want to successfully, quickly and safely treat 90% of their patients suffering from a musculoskeletal disorder.

Treating patients has never been easier, thanks to high-power GDT devices. Their performances enable exceptional treatment outcomes, while their design simplifies practice workflow.

- Relieve Pain
- Treat inflammation
- Stimulate natural healing

EMS DolorClast® Radial Shock Wave - The world's most clinically proven shockwave technology

Endorsed by:

Premium High-Energy Shock Wave

Unmatched performance delivering constant, high-energy impulses up to 25Hz. Designed for versatility.

Patient-centered treatment

Treat muscle injuries or large areas in no time. Overcome pain even in sensitive patients or painful pathologies.

Improved usability, experience and profitability

Comfortable to use, easy to set up, maintain and transport.

- No complications
- No addiction
- No downtime
- No side effects

"I have never come across a clinical adjunct that has had such a resoundingly positive impact on my patients care. Using the EMS Dolorclast® over time has alerted me to even more applications, so much so, I've benched all my other therapeutic devices."

Hayden Latimer
Physiotherapist - Sydney
