

NEW CLEAR Finger Splints

Oval-8® CLEAR Finger Splints provide the same easy-to-wear, comfortable support and features as the classic beige Oval-8 splints. Oval-8 CLEAR splints blend in with all skin tones and can be turned on the finger to keep **mallet** or **jammed fingers** straight; limit motion to stop **trigger finger** and **trigger thumb**; control **hypermobility** and protect and rest **crooked** fingers.

Each splint helps manage 6 or more conditions

Oval-8 splints can be adjusted using a narrow nozzle heat gun to alter fit, length and the angle the splint holds the finger. CLEAR splints require less heating time than the Beige splints and a more delicate touch when making adjustments.

Oval-8 CLEAR Finger Splint FAQs

Are the Oval-8 CLEAR Splints the same as the BEIGE Splints?

Both the Classic Beige splints and the NEW CLEAR splints are made in the same molds but they are made from different materials.

- Beige splints are 100% Polypropylene and CLEAR splints are made from Copolyester
- There may be minor variations in sizing but adjustments can be made to assure a proper fit
The CLEAR splints are more resistant to bending and it is best to avoid repeatedly stressing the splints

Can Oval-8 Splints be adjusted?

- Both the Beige and Oval-8 CLEAR splints can be adjusted with a heat gun with a narrow nozzle
- CLEAR splints require less heating time (2-3 seconds) than the Beige (3-4 seconds) and require less pressure to alter the splint

How long will Oval-8 Splints last?

How the splints are worn and used will determine how long the splints last. The Beige splints have been proven to last for several years of daily use. It is not yet known how long the CLEAR splints will last.

Do they contain latex?

No natural rubber latex was used in the product or packaging.
